SECTION III: RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Letter of Offer, including the risks and uncertainties described below, before making an investment in the Equity Shares. In making an investment decision, prospective investors must rely on their own examination and the terms of the Issue including the merits and risks involved. The risks and uncertainties described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently believe to be immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any or some combination of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the section “Summary of Letter of Offer” and “Introduction” on pages 20 and 43 respectively of this Draft Letter of Offer. The industry-related information disclosed in this section has been derived from publicly available documents from various sources believed to be reliable, but their accuracy and completeness are not guaranteed, and their reliability cannot be assured. Neither our Company, nor any other person connected with the Issue have independently verified the information in the industry report or other publicly available information cited in this section.

This Draft Letter of Offer also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 19 of this Draft Letter of Offer.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Audited Financial Information, prepared in accordance with Ind AS and the Companies Act and in accordance with the SEBI ICDR Regulations.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;*
- Some events may have material impact qualitatively instead of quantitatively; and*
- Some events may not be material at present but may have a material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another. In this Draft Letter of Offer, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

OBJECT RELATED RISK

1. We may be subject to liquidity risks, which may adversely impact our cash flows, financial condition and results of operations.

We may be subject to liquidity risks and cash flows mismatches due to repayment of borrowings and the interest thereon, payment towards our lease liabilities, payment to our creditors and outflows on our derivative liabilities. The repayment of our borrowings in certain years may give rise to a temporary mismatch. This may potentially give rise to a liquidity risk. If we are unable to refinance our borrowings on favourable terms, it could adversely affect our business, financial condition and results of operations. While our Company has sufficient current assets to

meet the obligations related to liabilities as and when they fall due, we cannot assure that such obligations will not impact payment of our liabilities. We cannot assure that such obligations will not impact our cash flows in the future. Further, our Company generates significant cash flows from our operating activities, however such cash flows are primarily used towards payment of purchase of property, plant and equipment, working capital and repayment of our borrowings, which may result in substantial decrease in our cash flows and may impact our operations. Any decrease in liquidity may also cause capital expenditures to be postponed or cancelled.

- 2. We intend to utilise the Net Proceeds for funding our capital expenditure requirements and we are yet to place orders for some of our capital expenditure requirements. There is no assurance that we would be able to source such capital expenditure requirements in a timely manner or at commercially acceptable prices.**

Of the total net proceeds, we propose to utilize ₹ 270 Lakhs and ₹ 1696.35 Lakhs of our Net Proceeds for:

- (i) Setting-up of Effluent Treatment Plant with 50 kilo litres per day capacity (Multiple Effect Evaporator); and
- (ii) Expansion of Business by setting up of new production facility including new factory building and plant and machinery.

For further information, see “Objects of the Issue” on page 48. We have not entered into any definitive agreements with any of the vendors and have relied on the quotations received from vendors. Further, such total estimated cost and related fund requirements have not been appraised by any bank or financial institution or any other independent agency. While we have obtained the quotations from identified vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations, that there will not be cost escalations and that we would be able to procure such equipment in a timely manner, or that we will complete our works within the estimated timelines, and if not, obtain extensions for the quotations at reasonable cost to us, if at all. There is no assurance that we would be able to source such upgradation in a timely manner or at commercially acceptable prices, which could adversely affect our expansion plans and consequently, our business and results of operations.

ISSUE RELATED RISK

- 3. In case we do not receive the minimum subscription, we will have to refund the entire subscription.**

Our Promoters have given their confirmation regarding their intention of not subscribing to the issue - jointly and / or severally.

Accordingly, in terms of the SEBI ICDR Regulations, the requirement of minimum subscription in the Issue shall be applicable. Pursuant to regulation 86(2) of the SEBI ICDR Regulations in case of non-receipt of minimum subscription, all application monies received shall be refunded to the applicants forthwith, but not later than four days from the closure of the Rights Issue.

- 4. Investors will be subject to market risks until the Equity Shares credited to the investor’s demat account are listed and permitted to trade.**

Investors can start trading the Equity Shares allotted to them, only after they have been credited to an investor’s demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on BSE and NSE, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor’s demat account in a timely manner or that trading in the Equity Shares will commence in a timely manner.

- 5. Applicants to the Issue are not allowed to withdraw or revise downwards their Bids after the Bid /Issue Closing Date.**

In terms of the SEBI ICDR Regulations, applicants in the Issue are not allowed to withdraw their Bids after the Bid/Issue Closing Date. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant’s demat account with depository participant could take approximately 7 days and up to 10 days from the Bid/Issue Closing Date. However, there is no assurance that material adverse changes in the international or

national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operations and financial condition, or other events affecting the applicant's decision to invest in the Equity Shares, would not arise between the Bid/ Issue Closing Date and the date of Allotment of Equity Shares in the Issue. The occurrence of any such events after the Bid/Issue Closing Date could also impact the market price of the Equity Shares. The applicants shall not have the right to withdraw their Bids in the event of any such occurrence. Our Company may complete the Allotment of the Equity Shares, even if such events may limit the applicants' ability to sell the Equity Shares after the Issue or cause the trading price of the Equity Shares to decline.

6. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains tax in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the stock exchanges, the quantum of gains and any available treaty exemption. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("**STT**"), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

7. Our Equity Shares are quoted in Indian rupees in India and investors may be subject to potential losses arising out of exchange rate risk on the Indian rupee and risks associated with the conversion of Indian rupee proceeds into foreign currency.

Investors are subject to currency fluctuation risk and convertibility risk since our Equity Shares are quoted in Indian rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. In addition, foreign investors that seek to sell Equity Shares will have to obtain approval from the RBI, unless the sale is made on a stock exchange or in connection with an offer made under regulations regarding takeovers. The volatility of the Indian rupee against the US dollar and other currencies may subject investors, who convert funds into Indian rupees to purchase our Equity Shares to currency fluctuation risks.

8. There is no guarantee that the Rights Equity Shares issued pursuant to this Rights Issue will be listed on the Stock Exchange in a timely manner.

In accordance with Indian law and regulations and the requirements of the Stock Exchange, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Rights Issue will not be applied for or granted until after the Rights Equity Shares has been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Rights Equity Shares to be submitted. Accordingly, there could be a failure or delay in listing the Rights Equity Shares on the Stock Exchanges. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted.

9. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other

countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

10. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

A large part of our business and customers are located in India or are related to and influenced by the Indian economy. The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. But, there can be no absolute assurance that such policies will be continued. The rate of economic liberalization could change, and specific laws and policies affecting the foreign investment, currency exchange rates and other matters affecting investment in India could change as well. Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

11. Information included in this Document has been derived from numerous sources. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

The statistical information, industry and market data, information regarding our position in the market, growth rates and other industry data pertaining to our business included in this Document relating to the industry in which we operate has been extracted from publicly available documents from various sources including information made available by peers publicly. While we believe that the information contained has been obtained from sources that are reliable, the accuracy and completeness of this information is not guaranteed, and its reliability cannot be assured. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon.

The market and industry data used from these sources may have been reclassified by us for purposes of presentation. In addition, market and industry data relating to India, its economy or its industries may be produced on different bases from those used in other countries. As a result, data from other market sources may not be comparable. The extent to which the market and industry data presented in this Document is meaningful will depend upon the reader's familiarity with and understanding of the methodologies used in compiling such data. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Document. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors. Accordingly, investment decisions should not be based on such information.

12. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the market prices of the Equity Shares of our Company.

13. It may not be possible for investors to enforce any judgment obtained outside India against us, our Promoter, Directors, or any of their directors and executive officers in India respectively, except by way of a lawsuit in India.

The Company is a limited company incorporated under the laws of India. Our Company's assets are primarily located in India and our Company's Promoters, Directors and Key Managerial Personnel are residents of India. The enforcement of civil liabilities by overseas investors in the Equity Shares, including the ability to effect service of process and to enforce judgments obtained in courts outside of India may be adversely affected by the fact that the Company is incorporated under the laws of the Republic of India and all of its executive officers and directors reside in India. As a result, it may be difficult to enforce the service of process upon the Company and any of these persons outside of India or to enforce outside of India, judgments obtained against the Company and these persons in courts outside of India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and Section 44A of the Code of Civil Procedure, 1908 ("**Civil Code**") on a statutory basis. Section 44A of the Civil Code provides that where a certified copy of a decree of any superior court, within the meaning of that Section, obtained in any country or territory outside India which the government has by notification declared to be in a reciprocating territory, may be enforced in India by proceedings in execution as if the judgment had been rendered by a district court in India. However, Section 44A of the Civil Code is applicable only to monetary decrees and does not apply to decrees for amounts payable in respect of taxes, other charges of a like nature or in respect of a fine or other penalties and does not apply to arbitration awards (even if such awards are enforceable as a decree or judgment).

The United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the government to be reciprocating territories for the purposes of Section 44A of the Civil Code. The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Code. A judgment of a Court of a country which is not a reciprocating territory may be enforced in India only by a suit upon the judgment under Section 13 of the Civil Code, and not by proceedings in execution. Section 13 of the Civil Code provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon except: (i) where the judgment has not been pronounced by a Court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or refusal to recognize the law of India, in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and/ or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. The suit must be brought in India within three years from the date of judgment in the same manner as any other suit filed to enforce a civil liability in India.

Further, there are considerable delays in the disposal of suits by Indian courts. It may be unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it may be unlikely that an Indian court would enforce foreign judgments if it viewed the number of damages awarded as excessive or inconsistent with public policy in India. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI under FEMA to repatriate any amount recovered pursuant to execution and any such amount may be subject to income tax in accordance with applicable laws. Any judgment or award in a foreign currency would be converted into Indian Rupees on the date of the judgment or award and not on the date of the payment.

RISK MATERIAL TO THE COMPANY AND ITS BUSINESS

14. The Statutory Audit Report for the period March 31, 2025 contains the following observations, reservations or adverse remark.

Following are the undisputed statutory dues as on March 31, 2025, which are outstanding and are yet to be paid as on the date of filing of this draft Letter of Offer:

Name of the Statute	Nature of dues	Amount in ₹ Lacs
The Income Tax Act, 1961	Tax Deducted at Source	12.06

As of the date herein, the Company has been unable to clear its outstanding dues owing to limitations in its available cash flows.

15. We are a API intermediaries product manufacturing company and any changes to the Pharmaceutical as well API industry or our product demand will adversely affect our revenues, financials and profitability.

We develop, manufacture and market API intermediaries which is primarily used as raw material by our customers for a variety of end user products. Any change in the regulatory framework in which we operate, change in competitive landscape or non-availability of raw materials at competitive pricing could impact our operations and profitability. Furthermore, if our customers' products cause, or are perceived to cause, severe side effects to the end-users, we may face a number of consequences, including, a severe decrease in the demand for and sales of our product; withdrawal or cancellation of regulatory approvals for production of paracetamol.

16. Significant differences exist between Ind AS used to prepare our financial information and other accounting principles, such as IFRS and U.S. GAAP, with which investors may be more familiar.

Our financial statements included in this Document are prepared and presented in conformity with Ind AS. Ind AS differs from accounting principles with which persons from other countries may be familiar, such as IFRS and U.S. GAAP. We have not attempted to quantify the effect of U.S. GAAP or IFRS on the financial data included in this Document, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. Accordingly, the degree to which our financial statements included in this Document provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting principles. Any reliance by persons not familiar with Indian accounting principles on the financial disclosures presented in this Document should accordingly be limited.

17. We have significant working capital requirements. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.

Our business requires working capital for day-to-day operations, procurement of raw materials, and production processes. In many cases, we are required to incur such working capital expenditure prior to receiving payments from customers, which may come through several months after we commence work on particular projects. While our typical debtor cycle is 90 days, in certain instances, we receive payments (i) on milestone basis; (ii) once accepted at the end of the OEM; (iii) within 30 days after receipt of material at the site, (iv) certain percentage of payment of the order value will be paid against submission of a bank guarantee. During the Financial Years 2025 and 2024, our Company did not incur any working capital. However, our working capital requirements may increase if, under certain orders from our customers, payment terms do not include advance payments, or such orders have payment schedules that shift payments toward the end of the order or otherwise increase our working capital requirements. We typically meet our working capital requirements through financing arrangements availed by us. As of March 31, 2025, our total working capital loans and cash credit facility amounted to ₹3500 Lakhs. Our ability to arrange working capital financing on favourable terms in the future is dependent on numerous factors, our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, security, limits, our track record of compliance of the covenants contained in our financial agreements, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate, credit availability from banks, investor confidence, the continued success of our current projects and laws that are conducive to our raising capital in this manner. If we are unable to complete future financings successfully or on terms favourable to us, it may have an adverse impact on our profitability and results of operation.

The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, economic conditions, engineering design changes, technological changes and additional market developments. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase,

and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

18. Increased cost of raw materials and inadequate supply may affect our business and the results of operations. Further, we are dependent on third parties for the timely supply of raw materials to our facilities and delivery of our products to our customers, which are subject to uncertainties and risks.

Our business depends significantly on our suppliers, who provide essential raw materials that we require to manufacture our products and to operate our business. We use a variety of raw materials in our business. We identify and approve multiple vendors to source our key raw materials with whom we place purchase orders from time to time, for the purchase of raw materials and equipment. We currently source our key raw materials from vendors in China, in addition from domestic.

For the six month period ended September 30, 2025, Financial years ended March 31, 2025, March 31, 2024 and March 31, 2023, our suppliers of raw materials are from China and India. The suppliers from China contributed 15% to our cost of raw material and components consumed and the balance is from domestic market. We cannot guarantee that we will be able to maintain uninterrupted access to these sources, or the price of such products, which in some cases may be affected by factors outside of our control and/or the control of our suppliers.

The supply of these raw materials may be impacted due to export restrictions by foreign countries. Further, we faced certain delays in procurement of raw materials during the COVID-19 lockdowns. While these did not materially impact our timelines to complete projects, any such delays in the future could adversely affect our project timelines. Our ability to identify and build relationships with reliable suppliers contributes to our growth and the successful and timely completion of our projects. Further, the prices and supply of raw materials may depend on factors beyond our control, including, inter alia, availability, economic conditions, exchange rates, production levels, transportation costs and import duties. Any disruption of our suppliers' operations and/or inadequate availability of quality raw materials could result in delay in our manufacturing process and adversely affect our reputation, business and results of operations. There can be no assurance that we will be able to replace such suppliers on commercially acceptable terms, or at all, which could adversely affect our production schedule, volumes and profitability. Further, in case of increase in the cost of raw materials, if we are unable to pass such increased costs to our customers, this could have a material adverse effect on our results of operations.

Further we also use third-party transportation services for the supply of raw materials to our manufacturing facilities. Disruptions of transportation services due to reasons such as natural disasters, strikes by transport unions, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair our ability to source raw materials and our ability to supply our products to our customers in a timely manner. In addition, some of our raw materials and products are imported and therefore subject to risks associated with transshipment of such products. There can be no assurance that such disruptions will not take place in the future and any such disruptions may adversely impact our cash flows, profitability and results of operations. In addition, significant increases in transportation costs due to various reasons such as increase in crude oil prices may adversely impact our profitability and results of operations.

19. Our Manufacturing Facilities are subject to client inspections and quality audits and any failure on our part to meet their expectations or to comply with the quality standards set out in our contractual arrangements, could result in the termination of our contracts and adversely affect our business, results of operations, financial condition and cash flows.

Pursuant to our contractual arrangements, certain of our clients have the right to regularly examine our manufacturing processes, quality control and procedures and registers of our Manufacturing Facilities after reasonable notice and at a reasonable time to ensure that our services are meeting our internal standards and regulatory requirements. Most of our clients routinely inspect and audit our Manufacturing Facilities. Any failure on our part to meet the expectations of our clients and to comply with the quality standards set out in our contractual arrangements, could result in the termination of our contracts and our clients may choose to source their requirements from our competitors. We may also incur significant costs to upgrade our Manufacturing Facilities and manufacturing processes. The occurrence of any such event could have an adverse effect on our business, results of operations, financial condition and cash flows.

20. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such a case, our business, results of operations, cash flows and financial condition may be adversely affected.

21. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could also adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares.

22. Our operations are dependent on the performance of the Indian economy and securities market.

The growth in our business has been directly related to the growth in the Indian economy. There have been periods of slowdown in the economic growth of India or periods where inflation was high. Such economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall, which affects agricultural production. Any slowdown or reversal in the growth of the Indian economy could result in a reduction in wealth in the Indian economy that can be diverted to savings and investment, a reduced interest in investment in the securities market and reduced foreign investment. Additionally, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively impact interest rates and liquidity, which could adversely impact the Indian economy and our business. Any adverse revisions to India's sovereign debt ratings may also adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could adversely affect our business, prospects, financial condition and results of operations and our ability to obtain refinancing, as well as the trading price of the Equity Shares.

23. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID- 19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 virus or a similar contagious disease could adversely affect the Indian economy and economic activity in the region. As a result, any present or future outbreak

of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

24. Any failure to comply with the provisions of the contracts entered into with our customers, especially the Gol Entities, could have an adverse effect on our business, financial conditions and results of our operations. Additionally, imposition of liquidated damages and invocation of performance bank guarantees / indemnity bonds by our customers could impact our results of operations and we may face potential liabilities from lawsuits and claims by customers in the future.

The contracts entered into with our customers, especially Gol Entities, contain onerous obligations and are subject to laws which give them certain rights and remedies including without limitation the following:

- terminate existing contracts for default, delays or force majeure conditions;
- demand encashment of warranty indemnity bonds / advance bank guarantee;
- reduce orders under, or otherwise modify, contracts or sub-contracts;
- claim intellectual property rights in products and systems produced by us; and
- control or prohibit the export of our products and services;

In the event that our customers enforce any of the above provisions, it could have an adverse effect on our business operations, financial conditions and results of our operations. Apart from the above, most of the contracts with our customers require our Company to pay liquidated damages in the event of delay in delivery of products.

We cannot assure you that, in the future, such contracts can be completed profitably or on terms that are commercially acceptable to us. Any time and/or cost overruns on our contract could have a material adverse effect on our business, results of operations and financial condition. The incurring of such liabilities pursuant to the imposition of liquidated damages or the invocation of such performance bank guarantees indemnity bonds relation to our contracts could have an adverse effect on our business, results of operation, and financial condition.

25. Our business and activities may be regulated by the Competition Act, 2002 and proceedings may be enforced against us.

The Competition Act, 2002 ("Competition Act"), or the Competition Act seeks to prevent business practices that have a material adverse effect on competition in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause a material adverse effect on competition in India is void and attracts substantial monetary penalties. Any agreement that directly or indirectly determines purchase or sale prices, limits or controls production, shares the market by way of geographical area, market or number of customers in the market is presumed to have a material adverse effect on competition in the relevant market in India and shall be void.

The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Gol notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India, or CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among other things, prohibit all agreements and transactions, which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. However, the effect of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any

prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, financial, condition, results of operations and prospects.

26. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity, and the price of our Equity Shares. We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

27. Our Company is involved in certain legal proceedings, which, if determined adversely, may adversely affect our business and financial condition.

Our Company is involved in certain legal proceedings at different levels of adjudication before various courts, tribunals and appellate authorities. In the event of adverse rulings in these proceedings or consequent levy of penalties by other statutory authorities, our Company may need to make payments or make provisions for future payments, which may increase expenses and current or contingent liabilities and also adversely affect our reputation. A summary of the proceedings involving our Company is provided below:

Cases filed against our Company

Nature of Litigation	Number of matters outstanding	Amount involved* (₹ in lakhs)
Involving criminal liability on the part of the issuer	-	-
Tax Proceedings	-	-
Material violations of the statutory regulations by the issuer	-	-
Economic offences where proceedings have been initiated against the issuer	-	-
Other Material Civil Litigation	01	60.83

If any new developments arise, such as a change in Indian law or rulings against us by Appellate Courts or Tribunals, we may need to make provisions that could increase our expenses and current liabilities. Further, such legal proceedings could divert our management's time and attention and cause us to incur significant expenses. Any adverse decision in any of these proceedings may have an adverse effect on our business, results of operations and financial condition.

28. We depend on our senior management and other key managerial personnel with technical expertise, and if we are unable to recruit and retain qualified and skilled personnel, our business and our ability to operate

and grow our business may be adversely affected.

Our performance and success depend to a large extent on the continued services of our experienced senior management team, executive directors and other key managerial personnel with technical expertise, who have made significant contributions to the growth of our business. We believe that the input and experience of our professionals is valuable for the development of our business and operations, and the strategic decisions taken by our Company. We cannot assure you that these individuals or any other member of our management team will not leave us or join a competitor and in the event that they no longer work with us. There is no assurance that we will be able to find suitable replacements for such key managerial personnel in a timely manner or at all and implement a smooth transition of responsibilities to any newly appointed key managerial personnel. The market for qualified professionals is competitive and we may not continue to be successful in our efforts to attract and retain qualified people. We may therefore need to increase compensation and other benefits in order to attract and retain personnel in the future, which may adversely affect the results of operations.

Our future success, amongst other factors, will depend upon our ability to continue to attract and retain qualified personnel. The specialized skills we require in our industry are difficult and time-consuming to acquire and, as a result, are in short supply. We may require a long period of time to hire and train replacement personnel when we lose skilled employees. Our inability to hire, train and retain a sufficient number of qualified employees could delay our ability to bring new products or services to the market and impair the success of our operations and our revenue could decline. This could have an adverse effect on our business and the results of operations. We will also have to train existing employees to adhere to internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us which may adversely impact our profitability and results of operations.

29. Our Company has incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

As on September 30, 2025, we had ₹ 4278.12 Lakhs (Short term borrowings ₹ 3631.35 Lakhs plus Unsecured loans ₹ 381.19 Lakhs and Secured loans ₹ 265.59 Lakhs) of outstanding debt in terms of long-term borrowings and short-term borrowings on our balance sheet from various banks, financial institutions and others. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet such obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds.

30. We may suffer uninsured losses or experience losses exceeding our insurance limits. Further, any deficiency in the quality of our products may expose us to claims and penalties which could have an adverse effect on our financial condition.

Our Company's operations at our manufacturing facilities are subject to inherent risks such as fires, natural disasters, theft, personal injury, damage to our machinery and/ or destruction to our premises due to factors out of our control. While we believe that the amount of our insurance coverage is adequate based on management assessment, our insurance policies do not cover all risks and are subject to exclusions and deductibles, and may not be sufficient to cover all damages, whether foreseeable or not. In addition, even if such losses are insured, we may be compelled to contribute a substantial deductible on any claim for recovery of such a loss, or the amount of the loss may exceed our coverage of the loss. If any or all of our manufacturing facilities are damaged in whole or in part, our operations may get interrupted, totally or partially, for a temporary period.

If any of our products sold by us fail to comply with applicable quality standards, it may result in customer dissatisfaction, which may have an adverse effect on our business, sales and results of operations. From time to time, due to human or operational error, products may not meet the specifications required by those customers

and may therefore be rejected by customers. In addition, we may incur liability for defective products, product recalls, and delays in delivery or fulfilling contracts. There can be no assurance that our customers or unrelated third parties will not make claims against us in the future that may result in negative profitability and adverse publicity. In case of any such product liability claims in the future, there can be no assurance that any product liability insurance we may obtain will be sufficient to indemnify us against such liabilities which may adversely impact our cash flow, results of operations and financial condition.

31. Our manufacturing facilities are subject to stringent quality checks, environmental laws and regulations that could cause us to incur significant costs. Any non-compliances on our part may adversely impact our operations, business and financial conditions.

Our manufacturing facilities are subject to a broad range of safety, health, environmental, workplace, and related laws and regulations in the jurisdictions in which we operate, which impose controls on the disposal and storage of certain substances, noise emissions and air and water discharges. Material future expenditures may be necessary, if compliance standards change, if material unknown conditions that require remediation are discovered or if required remediation of known conditions becomes more extensive than expected. Environmental laws could also restrict our ability to expand our facilities or could require us to acquire costly equipment or to incur other significant expenses in connection with our manufacturing processes. Additionally, our manufacturing facilities are certified by international standards of quality management systems such as USFDA. Any loss of such certifications could lead to loss of future projects.

32. Changing regulations in India could lead to new compliance requirements that are uncertain.

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect the manufacturing industry and the pharmaceutical industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Furthermore, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Any changes to such laws, may adversely affect our future business, prospects, financial condition, cash flows and results of operations.

We cannot predict whether any amendments proposed will have an adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

There can be no guarantee that we will be able to comply with any increased or more stringent regulatory requirements, in part or at all. Failure to comply with such further regulatory requirements could lead to regulatory actions, including penalties, which may have an adverse effect on our future business, prospects, financial condition, cash flows and results of operations.

33. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

The industry in which we operate is continually changing due to technological advances, scientific discoveries and novel chemical processes, along with constant introduction of new and enhanced products. These changes result in the frequent introduction of new products and significant price competition. Although we strive to maintain and upgrade our technologies, facilities and machineries consistent with current international standards, we cannot assure you that we will be able to successfully make timely and cost effective enhancements and additions to our technological infrastructure, keep up with technological improvements in order to cater to the specifics of our new products, geographical requirements, marketing needs, our customers' needs or that the technology developed by others will not render our products less competitive or attractive. In addition, the new technologies we adopt from

time to time may not perform as expected. The cost of implementing new technologies for our operations could be significant, which could adversely affect our business, financial condition, cash flows and results of operations.

34. If we infringe on the patents of others, our business may be adversely affected

We operate in an industry which may be subject to patent litigation and counterfeit products, including both litigation by competitors relating to purported infringement of innovative products and processes by generic pharmaceuticals and litigation by competitors or innovator companies to delay the entry of a product into the market. Patent litigation, infringement and allegation of counterfeit products can result in damages being awarded and injunctions that could prevent the manufacture and sale of certain products or require us to pay royalties in order to continue to manufacture or sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of damages or royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our patent and proprietary rights against others.

There can be no assurance that we will not be involved in any patent litigation in the future. In the event that we become involved in any patent litigation, our business, financial condition and results of operations could be adversely affected.

35. Reforms in the healthcare industry and the uncertainty associated with pharmaceutical pricing, reimbursement and related matters could adversely affect the marketing, pricing and demand for our products.

Our success will depend in part on the extent to which government and health administration authorities, private health insurers and other third-party payers will pay for our products. Increasing expenditures for healthcare has been the subject of considerable public attention in almost every jurisdiction where we conduct business. Both private and governmental entities are seeking ways to reduce or contain healthcare costs by limiting both coverage and the level of reimbursement for new therapeutic products. In many countries, including India, pharmaceutical prices are subject to regulation. Price controls operate differently in different countries and can cause wide variations in prices between markets. Currency fluctuations can aggravate these differences. The existence of price controls can limit the revenues we earn from our products.

36. We are subject to government regulations and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required for our business, our results of operations and cash flows may be adversely affected.

We are required to obtain and maintain a number of statutory and regulatory states, registrations, permits and approvals under central, state and local government rules in India, generally for carrying out our business and for our manufacturing facilities. In addition, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek new approvals, licenses, registrations and permits from time to time, as and when required in the ordinary course of our business.

Obtaining licences, registrations, permits and approvals or their renewals are time consuming processes and subject to frequent delays. We have obtained a number of licences, registrations, permits and approvals from the relevant authorities and are renewing such statutory approvals periodically for the existing facility. There is no assurance that such licences, registrations, permits and approvals or renewals will be issued or granted to us or updated in a timely manner or at all.

If we do not receive such licences, registrations, permits and approvals or renewals in a timely manner, it could result in cost and time overrun or our business and operations may be adversely affected. Moreover, certain approvals granted to us by statutory authorities may be revoked at any point of time due to circumstances which may or may not be within our control and this could have an adverse impact on our business and operations.

Our licences, registrations, permits and approvals are also subject to certain conditions, some of which may be onerous and require us to incur expenditure towards compliance with such conditions. We may also not be aware of certain approvals or permissions, which we may be required to maintain or acquire for undertaking our operations, under any new regulation or amended regulation made by any local or State Government. Any inability

to obtain, maintain or renew licences, registrations, permits and approvals required for our operations may adversely affect continuity of our operations.

If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, it may reduce our revenues, increase costs, adversely affect our business, financial condition and results of operations.

At present all the Statuary and regulatory licenses, permits and approvals as are required by the Company are valid in nature pursuant to which the Company presently carrying on the business operations in an active manner. Further, currently no such licenses have expired or in the process of renewal.

37. Our Directors, key managerial personnel and senior management personnel may have interests in our Company in addition to reimbursement of expenses incurred and receipt of remuneration from our Company

Our Directors, senior management personnel and key managerial personnel may be deemed to be interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their respective shareholding in our Company and as well as to the extent of any dividends or other distributions on the Equity Shares held by them respectively.

38. The availability of counterfeit drugs, such as drugs passed off by others as our products, could result in a material adverse effect on our business, financial condition, cash flows and results of operations

Entities in India and abroad could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. Such measures include, monitoring products in the market and initiating actions against counterfeiters, each of which entails incurring costs at our end. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

We cannot provide any assurance whether these will be replicated by the manufacturer of the spurious products, and therefore, may suffer financial losses as well as loss to our reputation, which may in turn result in a material adverse effect on our goodwill, business, financial condition, cash flows and results of operations.

39. We have had negative cash flows from Investing activities and financing activities for the Fiscal Year 2025 and 2024 and may continue to have negative cash flows in the future.

The following table sets forth net cash generated from / (used in) operating activities and financing activities for the periods indicated net cash flow in one the financial year:

*Figures for the FY 2023, 2024, 2025 are audited, while the figures for the period ended on September 30, 2025, are un-audited

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

40. There have been certain qualifications/remarks in the secretarial audit report issued by our secretarial auditor in the recent past.

The unspent CSR amount is required to be spent by March 31, 2026. 2,	In a few instances, the forms were filed with the Registrar of Companies after the prescribed time.	The Company ensures timely filing of all forms within the prescribed due dates

41. There have been certain fines by BSE Limited and NSE in respect of non-compliance of Regulation 17(1) of SEBI LODR Regulations.

Both the stock exchanges vide their letters dated May 29, 2025 imposed a fine of Rs.2,65,500/- (inclusive of GST) each for the non-compliance of Regulation 17(1) of SEBI LODR Regulations. The amount of fine increases by Rs.5,000 per day till the date of actual payment. However, our company has made a waiver application with both the stock exchanges on June 13, 2025, as there was no non-compliance in that respect. While it is not possible to predict the outcome of our application, we believe any adverse result could include payment of fine, which could negatively impact on our company and directors.

42. Our ability to pay dividends in the future will depend on our future cash flows, working capital requirements, capital expenditures and financial condition.

The amount of our future dividend payments, if any, will be at the sole discretion of our Board of Directors and will depend on our future earnings, cash flows, financial condition, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that we will pay dividends. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. Our historical payment of dividends is not indicative of any payments of dividends in the future. We may be unable to pay dividends in the near or medium term and our future dividend policy will depend on our capital requirements, financial condition and results of operations. Investors should consult their own tax advisors about the consequences of investing in or trading in Equity Shares.

Along with reactors, the project encompasses auxiliary systems and utilities such as graphite and stainless steel condensers, ancillary equipment for vapor column and reflux lines (PTFE and SS fittings), receivers (SS316 tanks of 1 KL and 2 KL capacity), a new boiler (around 5 Ton capacity), cooling tower units (approximately 500 TR), multiple vacuum pumps (including high vacuum pumps), utility piping and erection works, electrical panel boards and cabling for power distribution, and additional processing equipment like Agitated Nutsche Filters and Dryers (ANFDs) and centrifuges and HPLC AND GC FOR analytical Equipment. This new production block expansion is expected to significantly increase our manufacturing capacity, improve operational efficiencies by allowing parallel processing in multiple reactors, and meet the anticipated growth in demand for our products. The expanded infrastructure will position the Company to capitalize on new business opportunities and scale up production of both existing and new products.

SECTION XVI: RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will not be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) ("**DPIIT**"), Ministry of Finance, Department of Economic Affairs through the FDI Circular 2020 (defined below).

The DPIIT issued the Consolidated FDI Policy Circular of 2020 ("**FDI Circular 2020**"), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as at October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under the FEMA Rules will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non- resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Please also note that pursuant to Circular no. 14 dated September 16, 2003, issued by RBI, Overseas Corporate Bodies ("OCBs") have been derecognised as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and FEMA Rules.
